1. Overview

ECOVENT Operations is a browser-based portal for managing the full duct manufacturing lifecycle — from customer enquiry through design review, order confirmation, production, and multi-trip dispatch.

Key principle: Enquiry ≠ Order ≠ Dispatch

A customer enquiry captures intent and drawings. An order is created only after design approval. Each vehicle trip is a separate dispatch. One order can have many dispatch trips until fully delivered.

Role	Primary Use
Sales	Create enquiries, upload drawings, track customer projects
Design Engineer	Extract duct schedule, manage revision phases, approve design
Production Manager	Approve production start, log progress, mark ready for dispatch
Dispatch Coordinator	Create dispatch trips, vehicle details, share dispatch notes

To access the portal, open the login screen and click **Enter Demo**. Use the **Acting as** selector in the header to record who performs each action.

2. End-to-End Workflow

- 1 **New Enquiry** — capture customer, project, and drawing details. No order is created at this stage.
- 2 **Design Review** — engineer extracts duct tags, quantity, and area. Multiple revision phases supported (Rev 01, Rev 02...).
- 3 **Approve Design** — design must be saved and approved before order conversion.
- 4 **Convert to Order** — creates a production order linked to the enquiry.
- 5 **Production** — production manager approves start, logs progress updates, marks ready for dispatch.
- 6 **Dispatch Trips** — create one or more vehicle dispatches until balance reaches zero.

Every step is recorded in the **Delivery & Activity History** with the person name, role, timestamp, and phase.

3. Navigation & Display Views

Menu	Purpose
Dashboard	KPIs, featured enquiry workflow, recent enquiries and dispatches
Enquiries	All customer enquiries with stage filters and view modes
Orders	Manufacturing orders ready for or in dispatch
Dispatch	All vehicle trips across orders
Settings	Demo reset and application information

Toolbar Actions (per screen)

Screen	Actions
Dashboard	All Enquiries · New Enquiry · Create Dispatch (when ready)
Enquiries	New Enquiry
Orders	Create Dispatch (first dispatchable order)
Dispatch	New Dispatch Trip

Display Views

On Enquiries, Orders, and Dispatch lists, switch between **Cards**, **Grid**, and **Kanban**. Your preference is saved in the browser.

Acting as

The header dropdown lets you select the current user: Karthik S (Sales), Priya N (Design Engineer), Ravi M (Production Manager), or Suresh K (Dispatch Coordinator). All logged actions use this identity.

4. Creating a New Enquiry

Click **New Enquiry** from the Dashboard or Enquiries screen. This opens the enquiry form at `/enquiries/new` — not an existing record.

Customer Details

Field	Required	Description
Customer Name	Yes	Company or client name
Contact Person	Yes	Primary site contact
Phone	Yes	Contact number
Email	No	Contact email

Project Details

Field	Required	Description
Project Name / WO No	Yes	e.g. AIRMASTER-WO-900 — becomes order reference
Project Location	Yes	Site or city
Enquiry Date	Yes	Date enquiry received
Expected Completion	No	Target delivery date

Assignment

Field	Required	Description
Sales Person	Yes	Assigned sales representative
Priority	Yes	Low / Normal / High / Urgent
Source	No	Existing Customer, Referral, Website, etc.
Remarks	No	Scope notes, urgency, site constraints

Drawing Attachment

Upload customer drawing (PDF, DWG, DXF, Excel, or image). In demo mode the filename is stored. On submit, the system:

- Generates a unique enquiry number (e.g. ENQ-2026-0006)
- Logs *Enquiry created* and *Drawing uploaded* in activity history
- Navigates to the enquiry detail page for design review

Important: No manufacturing order is created when the enquiry is submitted. The order is created only after design approval and explicit conversion.

5. Design Review & Revision Phases

On the enquiry detail page, the workflow stepper shows progress through Enquiry → Design Review → Order → Manufacturing → Dispatch.

Design workflow

1. **Start Design Review** — begins Rev 01 extraction phase
2. **Save Duct Extraction** — enter duct tags, total quantity, total area (m²), and notes
3. **Approve Design** — locks extraction; logs approver name and date
4. **Request Revision** (optional) — sales or engineer requests changes with a reason; status becomes Revision Needed
5. **Start Next Revision Phase** — increments to Rev 02, Rev 03, etc.
6. **Convert to Order** — available only when design is approved

Each design action is logged with the revision number (e.g. *Design updated — Rev 02*) and the acting user's name.

6. Production Tracking & Activity Log

Production steps (on enquiry or order detail)

1. **Approve Production Start** — production manager authorises shop floor to begin (logged with name and date)
2. **Log Production Update** — record produced quantity (e.g. 12 / 18 qty)
3. **Mark Ready for Dispatch** — all items moved to ready stock

Activity history

The **Delivery & Activity History** section groups all events by phase:

Phase	Example events
Enquiry	Enquiry created
Design	Design review started, design updated, revision requested, design approved

Order	Converted to order
Production	Production start approved, progress updated, marked ready for dispatch
Dispatch	Dispatch Trip 1 created, Dispatch Trip 2 created, delivery completed

Each entry shows: action title, detail, **actor name**, **role**, **timestamp**, and revision/trip number where applicable.

The **Workflow Progress** summary strip shows the latest update per phase at a glance.

7. Order & Dispatch

Quantity tracking

Metric	Meaning
Ordered	Total on confirmed order
Produced	Fabricated quantity
Ready Stock	Available for dispatch
Dispatched	Already sent on previous trips
Balance	Remaining to dispatch

Dispatch workflow

1. Select order from Dashboard, Orders, or Enquiry detail
2. Select items — use + / – per tag or Select All Available
3. Enter vehicle details — vehicle number, driver, transporter, date/time
4. Preview — verify quantities, area, and remaining balance
5. Confirm — dispatch number assigned, balances updated, activity logged as Dispatch Trip N
6. Share — WhatsApp, email, or PDF dispatch note

Rules: Cannot dispatch more than available per tag. Order becomes Fully Dispatched when balance reaches zero.

8. Screen Guide

Screenshots captured from the live demo application.
